ADDRESS SERVICE REQUESTED

Both optimists and pessimists contribute to our society. The optimist invents the airplane and the pessimist the parachute. ~Gil Stern

**How long should you wait to fly  
after donating blood?**

The FAA's policy states "An airman who has donated 200cc. or greater blood for plasmapheresis or blood should not fly for at least 24 hours. However, when donating by new techniques such as "Double Red Cell Pherisis", pilots should wait at least 48 hours before flying.
